Abstract:

Every student in obtaining educational sciences, there is one thing that should they travel to see the results of the evaluation study that has been obtained previously, this is a test. This exam is given by the teaching staff in certain times. To organize the examination of the teaching staff must provide the questions that will be tested. This process is usually carried about by the teaching staff prior to conducting examinations to students.

Making process about who performed each test enghadapi make the performance less effective teachers, because more time is needed for the processing of these matters. For that needed a software that can process data about, with the aim of the work process lighten the teaching staff in creating problems when will execute the test.
